

# AIR FREIGHT

***Better solution, to a better you***

Our customers find that airfreight can dramatically reduce transit times on many routes with weaker highway or harbor infrastructure while, for smaller, urgent packages on prime routes, air can be a time-saving addition to other transportation modes. PLA ensures that the time advantage provided by air is used to the fullest extent, offering open co-load in addition to co-load consolidation services to make sure that, if necessary, shipments can be put on the first available flight.

# **AIR FREIGHT**

***Better solution, to a better you***

We have the necessary airfreight transport certification and specific expertise in the segment to get freight moving shortly after landing. Combined with the highly competitive pricing that only an operator of our size can offer, PLA's airfreight service is the perfect way for our customers to extend their networks with air.
